True Green Book with Logo

True Green: 100 everyday ways you can contribute to a healthier planet

Spread the word! This top-selling book comes personalized with your company logo on the cover and a customized insert page with your special message to clients!

Book Description:

True Green: 100 everyday ways you can contribute to a healthier planet

Global warming, climate change, toxic waste, and more: it sometimes seems the environmental challenges we face are just too huge for individual actions to matter, but they're not-and here's the proof. True Green is based on the practical experience of Clean Up the World, a grassroots environmental movement that has inspired more than 40 million volunteers in over 100 countries to take action since 1993. Whether you live in a city apartment, a suburban house, or a country farm, these simple, straightforward methods produce positive effects not just on our planet but on your pocketbook, too. True Green explores six key areas where small changes can make a big difference: In the Home; In the Garden; At Work; Shopping; Travel; and In the Community. Printed on paper from sustainably managed forests and is 100% recyclable. Softcover, 128 pages

Recycled Paper Pen

DESCRIPTION:

Retractable ballpoint pen with barrel made from recycled paper, wood clip, medium point, black ink and choice of trim color.

Recycled Paper Pen 2

DESCRIPTION:

Ballpoint pen with wood clip and barrel made of recycled paper.

PRODUCTION TIME: 2-3 weeks

COLORS: Black; Forest Green; Red; Reflex Blue

3 In 1 Desk Clock

DESCRIPTION:

3 in 1 desk clock features swaying floating pen, memo pad and a digital clock. Push button on the back to reveal memo pad pages.

SIZE: 11" x 4" x 4 1/2"

Recycled Sticky Note booklet

DESCRIPTION:

Sticky memo 1 - My Sticky Memo, custom printed, personal sticky memo pad using recycled stock.

Enviro-Jotter

This everyday environmentally friendly jotter is made from 100% post consumer waste deluxe recycled pressboard. Features ecological pigments and varnish and comes with 80 recycled pages.

Recycled Spinner Jotter

DESCRIPTION:

Original and fresh jotter featuring imported 100% post-consumer waste board, recycled sheets and wood tube binding.

SIZE: 3" x 4"

Mini-Eco-Jotter

This earth-friendly jotter is made from 100% post consumer waste – even the spiral is re-claimed metal.

Eco-Memo Journal

Memo journal made of 100% post consumer waste recycled materials. Cover is imported recycled linen finish board available in 8 colors featuring ecological inks and varnish. Paper is high quality de-inked milkweed. Also features complimentary recycled symbol debossed on lower back cover.

Grass Kit

DESCRIPTION:

Grass kit includes a 16 oz. tin container, wheat grass seed and soil. Allows you to create green grass right on your own desk. A great corporate gift item where businesses are looking to grow or for any grass root's organization. Also great gift for realtors, landscapers and health insurance companies looking to promote a healthy way of life. Add water and watch as the seeds start to grow.

Alloy Re-Fill-able Notebook

7" x 10" Aluminum front and black chip back - Notebook with 100 sheet lined filler. This alloy journal provides the bonus of allowing the sleek cover material to complement a client's promotional message. Made of the highest grade, heavy-gauge anodized aluminum with an anodized finish that resists scratching and with soft, smooth edges. The glossy surface is well suited. The lightweight, non-traditional journal with a reinforce in it's design images of innovation and durability.

Shake-to-Recharge Calculator

Shake to recharge calculator. Shake it left to right non-stop 20-25 times and enough electricity is generated to operate the calculator for 10 minutes. When the digits on the LCD screen dim, just shake it a few more times to recharge - your calculations won't be lost. Features silver aluminum face plate, ergonomic rubber grip and keys, and a large transparent display window for viewing the charging mechanism. Calculator provides for an interactive experience.

Shake-Charge Flashlight

Single coil shake-charge flashlight. Environmentally friendly, never needs batteries, water and weather resistant, the lightweight anytime flashlight is a dynamite promotional product and provides a convenient and enduring light source. 1 minute of shaking = 15 minutes of light. 7 1/8" long.

Recycled Tumbler

16 oz. insulated tumbler with the look of stainless steel - the benefit of acrylic. Features sipper lid and a unique combination of high lustre acrylic and metallic inserts; Contains recycled material.

Eco-Friendly USB Drives

Eco friendly flash drives are better for the environment because the materials used, such as lead-free solders, are more easily decomposed than their traditional counterparts and are less harmful to the environment. Advances in technology and materials have allowed us to produce eco-friendly drives with the same quality and price points as before. But we didn't stop there. We continued our quest to produce only environmentally safe products and made sure that our packaging (the vinyl snap pouch, neck lanyard, and paper insert) all met the eco-friendly standards that we set. You get the same 5x quality flash drive and packaging but only now, eco-friendly! We restrict the uses of the following hazardous materials to provide a more socially responsible answer to data storage: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls, and polybrominated diphenyl. In general, these five toxins have been identified as the five most common and harmful toxins in electronic components. They contaminate water supplies when they decompose and could pose a threat to customers who handle the product in unintended uses. One of the biggest material offenders to the environment in electronics and especially flash drives is solder. Solder is the liquid metal that binds all circuit boards in every electronic product and traditional solder is made with lead. The use of lead-free solders in eco friendly USB flash drives allows the drives to decompose without contaminated water with toxic lead. It has also provided immediate health benefits to our factory workers in both prototype and manufacturing operations. Their contact with solder paste no longer represents the same health-hazard it did before.
