Books & Journals

These journals sustain some of the most beautiful fabric making techniques used for centuries in cultures around the globe.

Five Fabric Choices:

- **Guatemalan Ikat** – Vibrant Hand-woven cotton fabric in a variety of colorful designs made by Mayan Indian Weavers from the Highlands of Guatemala. Famed for intense colors and the unique jaspe technique which creates figures and designs by special placement of dyed threads.
- **Indonesian Batik** – Hand-batiked natural cotton fabric from native villages in Indonesia. These fabrics are colorful with wonderful effects like cracking and soda-ash (which intensifies color) to enhance the contemporary designs paired with the ancient waxing technique.
- **African Batik** - Hand Batiked natural cotton fabric by traditional artisans in the country of Ghana. We use only their traditional Adinkra symbols. Each of these symbols carries its own meaning which is described on an attractive sticker on the back of the book.
- **Thailand Hill Tribe Cross Stitching** - Labor intensive counted cross-stitch weaving in traditional Hill Tribe motifs is the hallmark of this unique fabric. It is all on black fabric which offers a stunning contrast for these beautiful works of art.
- **Natural Woven Hemp** – Unbleached hemp fiber woven to give a natural, rough appearance.
