### These items are made with GREENGUARD.

GREENGUARD Environmental Institute (GEI) has established performance based standards to define goods with low chemical and particle emissions for use indoors, primarily building materials, interior furnishings, furniture, cleaning and maintenance products, electronic equipment, and personal care products. The standard establishes certification procedures including test methods, allowable emissions levels, product sample collection and handling, testing type and frequency, and program application processes and acceptance.

Maximum allowable emission levels are those required by the State of Washington's indoor air quality program for new construction, the US Environmental Protection Agency's procurements specifications, the recommendations from the World Health Organization, Germany's Blue Angel Program for electronic equipment, LEED for New Construction, and LEED for Commercial Interiors. Office furniture products meeting these allowable emission levels also meet the requirements of LEED credit 4.5 and the BIFMA X7.1 Conformance standard.

The ultimate in brand recognition! These items were custom designed and manufactured by Promotional Impact for Herman Miller displaying the same fabric that's used in their top selling Aeron Chair.
